MORINAGA MILK INDUSTRY CO., LTD.

1. Overview of 1H of FYE March 2013 Financial Results

2. FYE March 2013 Full-Year Business Forecasts

Cautionary Note Regarding Business Forecasts

Figures for plans, policies and other figures included in this report other than actual past results are forecasts of future business performance, and are calculated based on management's estimates and understanding of the information available to the Company at the time this presentation was prepared.

Accordingly, these forward-looking figures contain elements of risk and uncertainty, and actual results may differ from these forecasts for a variety of reasons. These elements of potential risk and uncertainty include economic condition in the Company's major markets, trends in demand for the Company's products, exchange rate movements, and regulatory changes and changes in accounting standards and business practices in Japan and other countries.

Monetary amounts in this presentation are shown in billions of yen, with amounts of less than ¥0.1 billion rounded to the nearest ¥0.1 billion, and as a result total figures may differ from the sum of the corresponding breakdown figures.

1. Overview of 1H of FYE March 2013 Financial Results

Differences Between Actual and Planned Business Results

Net Sales

Net sales rose on a rebound from the effect of the Great East Japan Earthquake in the previous year and large sales growth for yogurt from the strong performance that has continued from the last quarter of the previous fiscal year, and as a result total net sales were generally on plan.

Operating Income, Ordinary Income

Profit was less than planned, reflecting a weaker product mix from shortfalls in sales of ice cream, food service & institutional food products, chilled tea and others, as well as higher prices for raw material milk prices for processing, and an increase in sales promotion expenses.
